Lafferty - USA | High Pressure 2 Way Foamer

Stainless Steel, Bypass 2-Way Airless Foamer/Sprayer is a wash/rinse system for quickly applying two chemicals and rinsing through the same hose. Using a 3 - 6 GPM pressure washer. This stainless-steel venturi injection system draws and blends 2 chemical concentrate into the water stream to create an accurately diluted solution. The solution is then projected through the discharge hose and foam wand where it draws in atmospheric air to create wet, clinging foam. Use the spray nozzle to apply non-foaming chemicals and simply open the bypass ball valve to rinse at full volume and pressure.

Product #: 07 969752

Lafferty - USA | Hand Sanitizer Floor Mount Pedal Dispenser

The Sentry Spray Dispenser is an all-stainless-steel free-standing hand sanitizer or soap dispenser that is designed to encourage sanitary environments by reducing contamination due to hand contact. The Sentry is designed to pump liquid or low viscosity products. When the foot pedal is pressed, this industrial strength system draws a set amount of ready-to-use chemical and dispenses it directly into the user's hand. Perfect for dispensing hand sanitizer in food preparation areas, hospitals, retail store entrances and other public areas.
